

OFFICE OF POLICE OVERSIGHT

NOTICE OF COMPLAINT

October 7, 2022

ICMS #: 2022-0884

On October 5, 2022, the OPO received an online complaint.

The complainant alleges: I was in town visiting family and driving down [REDACTED]. I saw a bunch of cars slowing down in front of me so I put my foot on the brake and looked down to see that this was taking me from around 65mph to closer to 55-60mph. When I got past those cars that had slowed down, I started to speed up again when I saw a police car pull out behind me with his lights on. When the officer pulled me over, he told me I was going 82. I told him I wanted to see the information about his radar calibration because I had looked at my speed because of the other cars that were stopped and I knew I was not going that fast. He told me I could subpoena the records. When I put in the request through the city, I was told I had to go to the Police. When I went to the police, they told me that the information about radar calibration was part of a criminal investigation and couldn't be shared. They told me I would need to get a lawyer. I'll be out hundreds of dollars and hours of my time without being able to see all of the information that pertains to my case because the cops didn't want me to see it. Sounds like an easy way to make money without having to be accountable for maintaining your equipment or following the laws around radar calibration.

This notice of complaint is a request for Internal Affairs to initiate an investigation to determine if the employee conduct is within compliance of APD policy, Civil Service Rules, and Municipal Civil Service Rules.
