NOTICE OF COMPLAINT

September 30, 2022

ICMS #: 2022-0849

On September 26, 2022, the OPO received an email complaint.

The complainant alleges: I've had a terrible experience with the Austin police department. I've made several reports to the FBI and Department of Justice. My experience began when my former landlords reported me to the police for trespassing when I returned for my belongings which I was told were still on site and I was unable to get the police to escort me. The day before I was sorting through what they had given me to make sure every item was taken out of my apartment. They became unreasonable and did not allow me to complete the task.

When I was brought to jail I complained about a problem I'd been having that may be a red flag for human trafficking. They did nothing about this and used an email to get a court order to send me to a hospital to be diagnosed with illnesses that I have no history of and would not have been able to progress so far that I lost touch with reality. I've lost access to two platforms I worked on and have suffered other financial losses.

The officers that brought me to the hospital were unreasonably aggressive.

The person that reported my emails has a history of invading my privacy, bullying me, trying to cause then diagnose me with a mental illness, and possibly working with the community to psychologically abuse me as she has done with others, and I now know that has to be true otherwise this would not have happened. I have evidence that the APD would not allow me to present and labeled them as delusions.

An officer in the jail said I would be able to leave in 14 hours when I arrived. I was there for at least a week. The experience was psychologically abusing. I am trying to repair the damage that you have done and trying my best to work with your system but you're trying
