

## OFFICE OF POLICE OVERSIGHT

### NOTICE OF COMPLAINT

---

August 5, 2022

ICMS #: 2022-0630

On July 29, 2022, the OPO received an online complaint.

**The complainant alleges:** My complaint is really for a situation that happened and I would have thought that the police person would have done something (at least a warning). I was riding my bike from work (hospital) to home, when I went by the corner of [REDACTED] and [REDACTED] a small car (honda or Toyota?) turned left from [REDACTED] into [REDACTED] [REDACTED] the person saw me coming and almost hit me (I had to brake hard), there was a police car ([REDACTED] waiting in the first line on [REDACTED] making a left into [REDACTED] I had the right to continue straight but the car just went for it, the driver saw me there were not any big vehicles to make it difficult for driver to not see me. It is a situation that happens around twice a year to me and I have been fortunate to not have gotten hit. I find it really upsetting that this time a police car witnessed the whole thing and nothing happened to the driver at a minimum I would think a warning could have been given to driver. I guess I have to get hit in order for the police to do something about it? I pay lots of property taxes a year to live in a city where I should feel safe to ride my bike from home-work-home and recreationally. Having the constant reminder that in a second my life and my family"s can change to the worse is not fair. My only hope is that this can be discuss with the police person and perhaps send a warning to the car driver, there seemed to be cameras in that corner, if they work you should be able to go back to that time and see the whole event. Hopefully something happens...
